MONTHLY REPORT

TECHNICAL SERVICES BRANCH

ENGINEERING STAFF

1 December - 31 December 1966

1. Progress on renovation of the Langley Signal Center continues at a moderate pace with no major problems to date, however the shortage of experienced technicians is a continuing problem.
2. Although we continue to have many KY-3 component failures, the system down time for the past month has been kept to less than .3%. This low percentage of down time is directly attributable to the fine performance of the Langley Technical Section.
3. A KY-3 with call director is now operational at SPS and the R&D Lab.
4. Due to holiday leave and the general shortage of technicians we have slipped a bit on our P.M. schedules and overtime will continue to be required in the foreseeable future.
